

Tony Olugbusi

Senior Full-Stack Engineer

PHP • Laravel • Next.js • TypeScript • Node.js • MySQL • PostgreSQL • SaaS Architecture • ERP Systems

Lagos, Nigeria | Remote | ynotunited@gmail.com | madeitcodes.online

PROFILE

Full-stack engineer with strong experience designing, building, and deploying scalable SaaS platforms, ERP systems, and business automation solutions — end-to-end, from system architecture and database design to backend APIs, frontend applications, deployment, and production maintenance. Focused on real-world systems that solve business problems: invoicing, contracts, payments, client management, and workflow automation. Delivered production systems across fintech, healthcare, real estate, logistics, and enterprise environments using PHP, Laravel, Next.js, TypeScript, and MySQL. Flagship product is BuildLedger, a multi-tenant SaaS platform managing the full client lifecycle from onboarding to payment processing, designed and deployed independently.

TECH STACK

Languages & Frameworks: PHP, Laravel, Node.js, NestJS, Next.js, TypeScript, JavaScript

Databases: MySQL, PostgreSQL

Frontend: HTML, CSS, Tailwind CSS, Alpine.js, React

Integrations: REST APIs, Paystack, Flutterwave, Infobip

Tools & Infra: Git, Linux, VPS, Hostinger, Docker, Nginx

EXPERIENCE

Lead Full-Stack Engineer (Independent) — Webxpress Technologies & MadeIT Codes 2010 – Present

- Designed and delivered 50+ production web and software systems across fintech, healthcare, logistics, real estate, and NGO sectors
- Built ERP-style platforms, SaaS applications, booking systems, and payment-enabled business tools
- Architected full-stack systems using Laravel, PHP, React, Next.js, and MySQL
- Integrated payment gateways (Paystack, Flutterwave) and communication APIs (Infobip SMS/notifications)
- Managed full deployment lifecycle including VPS setup, DNS configuration, server optimization, and production maintenance
- Led system architecture decisions for scalable business applications and automation tools
- Run independently alongside full-time roles below

Full-Stack Developer — NeGSt Technologies Apr 2023 – Dec 2025

- Built and maintained enterprise-grade applications using PHP, Laravel, MySQL, and REST APIs
- Developed backend systems including authentication, roles, permissions, and business workflows
- Designed and integrated RESTful APIs for internal systems and third-party services
- Optimized database performance and refactored legacy systems for scalability and stability
- Collaborated with engineering teams on system design, code reviews, and production deployments

Web Administrator — PropertyLink Real Estate Investment Ltd, Lagos 2013

- Maintained and extended company website and backend systems using PHP and MySQL
- Built internal tools for property listing management and client tracking
- Designed marketing materials and managed digital communication systems

Web Developer & Instructor — SIRL Technologies, Lagos 2008 – 2009

- Developed web applications using HTML, CSS, JavaScript, PHP, and MySQL
- Built system diagrams and application logic structures for software projects
- Delivered training in web development and evaluated student projects

KEY PROJECTS

- Claimam.org.ng — verification platform
- Kolak Hospital — hospital management system
- ATMOS Ltd — engineering company web system
- NGO & cooperative platforms (multiple deployments)

FOUNDER PROJECTS

BuildLedger (SaaS Platform) — Founder — buildledger.madeitcodes.online Jan 2026 – Present

Production-ready multi-tenant SaaS platform for managing proposals, contracts, invoices, payments, and project workflows.

- Designed system architecture and multi-tenant structure
- Built full backend API and business logic layer using Laravel
- Developed frontend dashboard and client portal using Next.js
- Implemented authentication, roles, and permission systems
- Integrated payment workflows and business automation logic
- Deployed and maintained production system on VPS infrastructure

eFinder — Lost & Found System 2025

- Full-stack PHP/MySQL platform with admin and user dashboards for real-time item tracking and discovery

Marketplace Platform (WooCommerce + Dokan/WCFM) 2022

- Multi-vendor e-commerce system with vendor dashboards, commission tracking, and order management

EDUCATION

University of Ibadan — Professional Diploma in Statistics 2009 – 2012

Lagos City Polytechnic — National Diploma, Computer Science 2007 – 2009

IMS Computer School — Diploma in Computer Engineering 2004 – 2005

STRENGTHS

SaaS Architecture & System Design, Full-Stack Engineering (Frontend + Backend), API Development & Integration, Database Design & Optimization, Payment System Integration, Scalable Backend Systems, Business Process Automation, Production Deployment (VPS, Docker, Nginx)
